CUSTOMIZATIONS AVAILABLE

Side View

90° Camera Viewing Angle

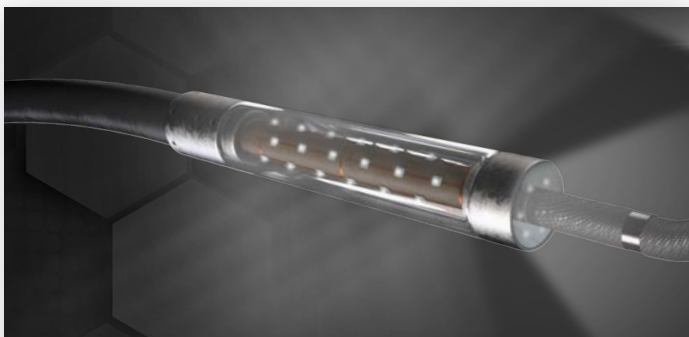

Transform inspections with our innovative side-view optical tip, ideal for tight spaces and internal component examination. With a unique 90-degree camera angle, pinpointing cracks, breaks, and corrosion is effortless, setting new standards for precision.

Dual View

Dual Camera Viewing Angle

These probes offer unmatched versatility with its two high-resolution cameras: one forward-facing and the other angled at 90 degrees. Easily switch between views to identify debris, damage, or irregularities for thorough component inspections.

Light Saber Guide Tube

Illuminating Guiding Tube

Introducing the Light Saber, a powerful probe accessory that illuminates inspections with unparalleled brightness. Enhance visibility in even the darkest spaces, ensuring thorough examination and precise detection of flaws.

Ultraviolet

UV Inspection Probe

The Ultraviolet probe emits a bright ultraviolet light for leak detection during inspections. By illuminating dye traces, it reveals leaks invisible to the naked eye, ensuring thorough assessments and timely maintenance.

EPIC

Pipe Inspection Camera System

Providing unmatched durability, this advanced system delivers an exceptional inspection experience with interchangeable cameras, extended tube lengths, and enhanced features.

Top Features:

- ◆ 4-way, 360° Remotely Controlled Pipe Camera
- ◆ 30 Meter (100 Feet) Length x 5.5mm Diameter Pipe Camera
- ◆ Versatile 40mm Full Rotational Camera Head
- ◆ 24mm Wide Angle Camera Head Attachments
